Reliability Engineering Products

Interested and prospective clients, enquire about how we can increase your equipment reliability and contain operating costs at support@optilog.co.za

REW (Reliability Engineering Workbench) - The Reliability Engineering Workbench seamlessly integrates
isk
and
Reliability Management Processes
in compliance with specific SAE, AS/NZS and Mil Standards....

R

REW Modules are:

- PCA (Plant/Equipment Criticality Assessment)
- FMECA (Failure Mode Effects and Criticality Analysis)
- RCM (Reliability Centred Maintenance)
- RCA (Root Cause Analysis)
- ERMO (Existing Routine Maintenance Optimisation)

{phocadownload view=file|id=2|text=Download REW Brochure|target=b}

Decision Support (Distributor of the TFD Suite of products)

MAAP[®] (Life Cycle Cost Modelling) - In a nutshell, MAAP[®] can be used to study the resource and cost implication of the deployment, operation and support of complex, evolving systems in dynamic operating scenarios....

{phocadownload view=file|id=6|text=Download MAAP Brochure|target=b}

VMetric[®] (Spares Optimisation) - Is your organisation chronically short of the spare parts it needs to keep critical systems in operation while your warehouse bulges with stocks that never move...

{phocadownload view=file|id=5|text=Download VMetric Brochure|target=b}

EDCAS[®] (Level of Repair and Early LCC Trade-off) - By giving almost immediate feedback on the life support costs and logistic performance of design alternatives EDCAS[®] brings logistic concerns insight the system engineering decision loop....
